

Plexuspharmaco Website — 100 Mistakes / QA Findings

Spelling, content consistency, UX, technical, performance, SEO and pharmaceutical-claim review based on the supplied/live website content. Findings involving regulatory or corporate claims require verification against official documentation.

A. Homepage

#	Finding	Recommended correction / action
1	"kid s health support"	Use "kids' health support" or a product-specific claim.
2	"multivitamin"	Correct to "multivitamin".
3	"PlexWell_Junior"	Use "PlexWell Junior" in customer-facing text.
4	"multivitamin kids liquid"	Use "children's multivitamin liquid" or the approved product name.
5	"200ml"	Use consistent unit formatting: "200 mL".
6	"50ml"	Use "50 mL".
7	"20ml"	Use "20 mL".
8	"daily 2 multivitamin gummies"	Use "2 gummies daily".
9	"anti aging ageslow complex support" on Kids Digesmart	Replace with the correct product-specific description.
10	"anti aging ageslow complex support" on Diacare	Replace with the correct product-specific description.
11	Repeated generic product description	Create individual descriptions for each product.
12	Homepage counter displays 0+ Global Partners	Fix the data source/counter or temporarily remove it.
13	Homepage counter displays 0+ Years Combined Experience	Fix the counter/data source.
14	Homepage counter displays 0 Therapeutic Categories	Fix the counter/data source.
15	Homepage counter displays 0+ Research Scientists	Fix the counter/data source.
16	"life-saving medicines"	Use a less absolute statement unless specifically substantiated.
17	"absolute transparency"	Prefer "transparency, accountability, and trust".
18	WHO GMP/EU GMP claims	Verify the exact certification/compliance status and scope.
19	"uncompromising safety and efficacy"	Avoid absolute safety/efficacy wording unless supported.
20	Global hub locations vs footer locations	Reconcile UK/Germany/France/USA/Singapore claims with actual offices.

B. Product Catalogue

#	Finding	Recommended correction / action
21	"Men Health"	Correct to "Men's Health".
22	"Women Health"	Correct to "Women's Health".
23	"Kids Health"	Prefer "Kids' Health" if that is the intended category.
24	"Age-Slow Complex"	Consider a clearer approved category such as "Healthy Ageing/Aging".
25	"Beauty & Care"	Consider "Beauty & Personal Care" if accurate.
26	Inconsistent product naming	Standardize capitalization, dosage form, and pack size.
27	"multivitamin_100 tablets"	Remove underscore: "multivitamin 100 tablets".
28	"multivitamin_Powder sachet"	Remove underscore and standardize capitalization.
29	"multivitamin_Spray"	Remove underscore.
30	"FERTi-PRO TABLET (Fertility Support))"	Remove the extra closing parenthesis.

#	Finding	Recommended correction / action
31	Mixed capitalization in MEN 70+ products	Standardize product-name capitalization.
32	"PlexWell_FERTi-PRO"	Remove database-style underscore.
33	"PlexWell_PROSTi-PRO_softgel"	Remove underscores and standardize "Softgel".
34	"PlexWell_ERECTi-PRO_Capsule"	Remove underscores and standardize "Capsule".
35	"PlexWell_Omega+Probiotics+Curcumin"	Use a readable customer-facing product name.
36	"softgel_blister pack"	Remove underscore.
37	"Omepren 1000mg"	Use consistent number/unit formatting, e.g. "1,000 mg".
38	"men s health support"	Correct punctuation to "men's health support" or rewrite.
39	"women s health support"	Correct punctuation to "women's health support" or rewrite.
40	Product count synchronization	Keep catalogue, pipeline, homepage and database counts synchronized.

C. Pipeline / R&D;

#	Finding	Recommended correction / action
41	Very large Pipeline page	Optimize the large rendered dataset; use pagination/virtualization where appropriate.
42	"162 active programs" vs "45 active R&D; projects"	Define the metrics so the numbers are not confusing.
43	"Men Health"	Use "Men's Health".
44	"Women Health"	Use "Women's Health".
45	"Large Scale Trials"	Use "Large-Scale Trials".
46	Repeated "kid s health support"	Correct spelling/grammar.
47	Repeated "men s health support"	Correct spelling/grammar.
48	Repeated "women s health support"	Correct spelling/grammar.
49	"men women wellness pouches support"	Rewrite as grammatically correct, product-specific copy.
50	"Multiitamin"	Correct to "Multivitamin".
51	"PLexwell"	Standardize to the approved brand spelling, e.g. "PlexWell".
52	"Omeha-Alpha"	Verify spelling; likely intended to be "Omega-Alpha".
53	"OMGA 3 6 9"	Verify and standardize to the approved "Omega 3-6-9" format if applicable.
54	"200ml"	Use "200 mL".
55	"150ml"	Use "150 mL".
56	"75ml"	Use "75 mL".
57	"20ml"	Use "20 mL".
58	"10000 IU"	Apply consistent number/unit formatting.
59	"20000 IU"	Apply consistent number/unit formatting.
60	Phase II/III labels on supplement products	Verify classification and terminology; do not imply drug clinical phases incorrectly.

D. Pipeline Product Copy

#	Finding	Recommended correction / action
61	Vitamin D3 teen products use Age-Slow copy	Replace with the correct product description.
62	Adult Vitamin D3 products use generic Age-Slow copy	Use product-specific approved copy.

#	Finding	Recommended correction / action
63	Osteomax products use generic Age-Slow copy	Verify intended indication/claim and replace generic text.
64	Omega products use “men women wellness” copy	Replace with formulation/intended-use-specific text.
65	Children’s Omega syrup uses men/women copy	Replace immediately with children-specific copy.
66	Children’s Omega gummies use men/women copy	Replace immediately with children-specific copy.
67	Omega product names expose underscores	Remove internal database formatting.
68	Eye-vitamin products repeat generic copy	Create accurate product-specific descriptions.
69	Male-health products use generic men’s-health wording	Use formulation-specific, compliant claims.
70	Kids products use generic kids-health wording	Use age-appropriate, product-specific claims.

E. About Page

#	Finding	Recommended correction / action
71	“25+ years” with “over/more than”	Use either “25+ years” or “more than 25 years”, not both.
72	“over 25+ years”	This is redundant; choose one construction.
73	Company founded in 2018 vs experience claims	Clearly distinguish company age from combined team experience.
74	Manufacturing hubs vs listed offices	Verify Spain/France claims against actual facilities.
75	APAC/Latin America headquarters claims	Verify actual locations and list them consistently.
76	40/45/50-country figures	Define exactly what each number measures.
77	“carbon-neutral manufacturing by 2035”	Reconcile with other sustainability targets.
78	“carbon-neutral operations by 2030”	Reconcile with the 2035 target.
79	“global pharmaceutical powerhouse”	Consider more factual, less promotional wording.
80	FDA Registered / GLP Compliant claims	Verify exact registrations/compliance scope before publication.

F. Sustainability

#	Finding	Recommended correction / action
81	100% wastewater treated/recycled/reused	Substantiate the KPI and define scope/baseline.
82	60% renewable energy by 2028	Provide a measurable baseline and scope.
83	Net-zero by 2030	Align terminology and target with the About page.
84	10,000 volunteering hours annually	Verify the KPI and reporting period.
85	Community programs and grants	Publish only programs that actually exist and can be supported.

G. Manufacturing

#	Finding	Recommended correction / action
86	“billions of doses annually”	Verify actual production capacity.
87	“5B+ doses annually”	Verify and document this exact figure.
88	“12+ global facilities”	Ensure all facilities exist and are consistently listed.
89	“zero-defect quality mandate”	Avoid absolute claims; use continuous-quality language.
90	“we control the entire value chain”	Use only if demonstrably true across the stated operations.

H. Quality / Regulatory

#	Finding	Recommended correction / action
91	QMS alignment with FDA/MHRA/EMA/WHO	Use precise regulatory terminology and scope.
92	“guarantees product safety”	Avoid guarantees; use evidence-based quality wording.
93	“ensuring continuous patient protection”	Avoid absolute claims.
94	“Every dose ... promise of health”	Consider more formal quality-system language.
95	“full adherence” to EU/FDA requirements	Specify product, facility and jurisdiction scope.

I. Contract Manufacturing / R&D; / Technology

#	Finding	Recommended correction / action
96	White Labelling vs White Labeling	Choose UK or US spelling and use it consistently.
97	CMO/CDMO scope	Clearly separate development, manufacturing and packaging services.
98	“absolute process equivalency”	Review and soften if it is an absolute technical claim.
99	45 active R&D; projects vs 162 programs	Explain whether these are different metrics.
100	eQMS terminology	Define “electronic Quality Management System (eQMS)” on first use and describe the actual capability.

Performance test recommendations

- Run Google Lighthouse/PageSpeed on desktop and mobile.
- Measure LCP, INP and CLS; optimize the homepage hero and product images.
- Lazy-load below-the-fold product images and use WebP/AVIF where supported.
- Paginate or virtualize the large Pipeline dataset instead of rendering all records at once.
- Check JavaScript bundle size, network requests, caching and third-party scripts.
- Test all navigation links, product pages, forms, email links, 404s, sitemap.xml and robots.txt.
- Check every page for a unique title, meta description, canonical URL, H1 and Open Graph metadata.
- Test responsive layouts at 360px, 390px, 768px and desktop widths.

Important note

The spelling/formatting findings are editorial QA observations. Regulatory, certification, manufacturing-capacity, EMA/FDA, sustainability, testimonial and corporate-statistic findings are verification flags rather than conclusions that the claims are false. Confirm them against the company's actual records before publication.
