

PLEXUSPHARMACO EUROPE

MASTER END-TO-END WEBSITE TESTING

REPORT

Live deployment: plexuspharmaco-eu.vercel.app

Audit date: 18 August 2026

Scope: complete supplied 105-point QA matrix + live website evidence + functional regression suite + developer execution method

105 source tests	10 critical	30 high	37 medium	28 low	40 additional functional tests
---------------------	----------------	------------	--------------	-----------	-----------------------------------

Executive release status: NOT READY FOR FINAL SIGN-OFF.
The live site is reachable, but the current environment cannot honestly claim that all browser/device/DOM/network/performance/security tests have been executed. This master report therefore separates **live evidence** from **tests requiring real Playwright/device execution**.

1. Executive Summary

The supplied QA audit defines 105 inspection items across Apple iOS/WebKit Safari, Android/Chromium, Windows/cross-browser desktop, navigation/layout/content, and performance/network/forms/security. The supplied document recommends Playwright and named browser/device projects. ■filecite■turn0file0■L24-L44■

The live website currently exposes a broad navigation structure, four language controls, product catalogue links, corporate/legal pages, a newsletter form, global-office information and multiple product-detail entries. ■filecite■turn0file0■L14-L30■

The most important live content finding is that four homepage KPI counters currently render as zero: Global Partners, Years Combined Experience, Therapeutic Categories and Research Scientists. ■filecite■turn0file0■L140-L153■

The product area also contains visible text-quality defects, including “kid s”, “multiviamin”, “anti aging ageslow” and a malformed product title ending with “))”. ■filecite■turn0file0■L48-L56■

The homepage newsletter contains an email input and Subscribe action and states that subscription implies agreement to the Privacy Policy and corporate communications, so form validation, consent, network failure and duplicate-submit behavior must be explicitly tested. ■filecite■turn0file0■L315-L321■

2. Confirmed / High-Priority Live Findings

LF-01 — HIGH — Homepage KPI counters display zero values

The live homepage shows 0+ Global Partners, 0+ Years Combined Experience, 0 Therapeutic Categories and 0+ Research Scientists.

Required action: Replace with validated production values or hide the counters until data is available.

LF-02 — MEDIUM — Product content contains spelling/formatting defects

Live text includes “kid s”, “multiviamin”, “anti aging ageslow”, “PlexWell_Junior”, and a product title ending with “))”.

Required action: Run a complete content QA pass across all product names, descriptions and metadata.

LF-03 — MEDIUM — Newsletter submission requires E2E verification

The homepage exposes an email input and Subscribe control, but live crawl cannot prove success, validation or failure behavior.

Required action: Test valid, invalid, empty, duplicate and network-failure submissions in Playwright.

LF-04 — MEDIUM — Language switcher requires complete functional verification

English, German, French and Spanish controls are exposed, but a crawl cannot prove all strings change or persist.

Required action: Test every supported language across major routes and verify untranslated strings.

LF-05 — MEDIUM — Legal/certification claims require owner verification

The site displays WHO GMP, ISO 9001:2015, EU GMP and corporate claims.

Required action: Verify every claim against authoritative certificates, registrations and approved corporate copy.

LF-06 — LOW — Product count/load-more requires regression testing

Catalogue states 162 premium solutions and 150 remaining, consistent with 12 initially displayed.

Required action: Run Load More to completion and verify count, duplicates, missing items, images and state persistence.

3. Route & Page Coverage Inventory

The homepage currently exposes the following major navigation destinations. The status below is deliberately conservative: “Needs browser E2E” does not mean the route is broken; it means a complete interaction/regression test has not been executed here.

Area	Path	Coverage	Status
Home	/	Core landing page, navigation, KPIs, products, newsletter, footer	Live reachable
About Us	/about-us	Company profile and corporate claims	Needs browser E2E
Corporate Governance	/corporate-governance	Governance/legal corporate information	Live route sampled
CSR	/corporate-social-responsibility	Sustainability/CSR content	Needs browser E2E
News & Media	/news-media	News listing/detail navigation	Needs browser E2E
Investor Relations	/investor-relations	Investor information	Needs browser E2E
Careers	/careers	Job/career flow	Needs browser E2E
Product Catalogue	/product-catalogue	Search/filter/load-more/product details	Live route sampled
Pipeline / R&D	/pipeline-rd	R&D pipeline/tables	Needs responsive E2E
Patient Support	/patient-support-programs	Patient-support information	Needs browser E2E
Healthcare Professional Tools	/healthcare-professional-tools	HCP tools/content	Needs browser E2E
Manufacturing	/manufacturing-capabilities	Manufacturing capabilities	Needs browser E2E
Quality Assurance	/quality-assurance-control	Quality systems	Needs browser E2E
Regulatory Compliance	/regulatory-compliance	Regulatory claims	Needs owner verification
Contract Manufacturing	/contract-manufacturing	CMO services	Needs browser E2E
Global Presence	/global-presence-logistics	Offices/logistics	Needs browser E2E
R&D	/research-development	R&D content	Needs browser E2E
Technology Platforms	/technology-platforms	Technology content	Needs browser E2E
Intellectual Property	/intellectual-property	IP content	Needs browser E2E
Licensing Opportunities	/licensing-opportunities	Licensing flow	Needs browser E2E
Business Partnerships	/business-partnerships	Partnership/contact flow	Needs browser E2E
Privacy Policy	/privacy-policy	Privacy/GDPR content	Live route referenced
Terms of Service	/terms-of-service	Terms/legal content	Needs browser E2E
Sitemap	/sitemap	Site map/navigation	Needs direct XML/DOM verification

4. Additional 40-Point Functional Regression Suite

These tests extend the supplied 105-point technical matrix into a practical business-function regression suite for the current website.

ID	Area	Test	Expected result
F-01	Smoke	Homepage loads without blank/error state	200/usable page, title and H1 visible
F-02	Navigation	Open every header menu item	Correct final URL; no dead link
F-03	Navigation	Open every footer link	Correct destination; no 404
F-04	Navigation	Browser Back/Forward after route changes	Correct page/state restored
F-05	Product	Open Product Catalogue	Catalogue loads without JS errors
F-06	Product	Search exact product	Matching result displayed
F-07	Product	Search impossible term	Explicit zero-result state
F-08	Product	Clear search	Full product state restored
F-09	Product	Load More repeatedly	No duplicate/missing products
F-10	Product	Open every product detail	Correct product title/content/image
F-11	Product	Broken image fallback	No broken-image icon/blank layout
F-12	Language	Switch English → German	Representative UI strings change
F-13	Language	Switch German → French	Representative UI strings change
F-14	Language	Switch French → Spanish	Representative UI strings change
F-15	Language	Reload after language change	Expected language/state persists
F-16	Forms	Newsletter empty submit	Clear validation; no silent failure
F-17	Forms	Newsletter invalid email	Clear validation
F-18	Forms	Newsletter valid email	Success state/network response
F-19	Forms	Double-click Subscribe	No duplicate submission
F-20	Forms	Network failure during submit	Visible failure/retry state
F-21	Responsive	320px width	No horizontal overflow
F-22	Responsive	390px width	No clipped CTA/menu
F-23	Responsive	768px width	Tablet layout stable
F-24	Responsive	1024px width	Grid/footer stable
F-25	Responsive	1440px width	No excessive stretching
F-26	Accessibility	Tab through homepage	Visible focus; logical order
F-27	Accessibility	Check heading hierarchy	Single primary H1 and logical levels
F-28	Accessibility	Image alt audit	Meaningful images have appropriate alt
F-29	Accessibility	Contrast audit	WCAG AA target checked
F-30	Error handling	Invalid URL	Branded 404 and HTTP 404
F-31	SEO	Title/meta/canonical	Expected metadata on major routes
F-32	SEO	OpenGraph preview metadata	og:title/description/image
F-33	SEO	robots.txt	Production indexing policy
F-34	SEO	sitemap.xml	Valid XML and valid URLs
F-35	Security	HTTPS/mixed content	No insecure subresources
F-36	Security	Security headers	CSP/X-Frame/X-Content-Type etc.
F-37	Performance	Initial page load	Performance budget measured
F-38	Performance	Image payload audit	Large assets optimized
F-39	Performance	JS bundle audit	Unused code identified
F-40	Performance	CLS/INP/LCP	Core Web Vitals recorded

5. Full E2E Execution Method

1. Freeze test target

Record production URL, deployment timestamp, branch/commit, environment variables and supported browser/device matrix.

2. Build route inventory

Collect all internal routes from header, footer, sitemap and product links. Record expected status/title.

3. Smoke testing

Load home, hard refresh, check H1/title, primary CTAs, images, console errors and basic navigation.

4. Functional testing

Search, filters, Load More, product detail, language switching, forms, modal/CTA behavior and all key workflows.

5. Responsive testing

320, 375, 390, 430, 768, 820, 1024, 1280, 1440 and 1920px; test portrait/landscape where relevant.

6. Cross-browser testing

Chromium/Chrome, Firefox, WebKit/Safari and Edge where available; compare layout and interaction.

7. Accessibility

Keyboard, focus, headings, labels, alt text, contrast, zoom, high-contrast mode, touch targets and reduced motion.

8. Network testing

Fast/slow/offline modes, failed API, timeout, retry, cache behavior and duplicate requests.

9. Performance

Record LCP, CLS, INP, TTFB, JS transfer, image transfer, font behavior and third-party cost.

10. Security/privacy

HTTPS, mixed content, CSP, X-Frame/frame-ancestors, X-Content-Type-Options, cookies, consent, CORS, XSS handling and source maps.

11. SEO

Title, description, canonical, robots, sitemap, OG/Twitter cards, status codes and indexability.

12. Evidence

Screenshot/video, trace.zip, console log, network request, environment and exact reproduction steps.

13. Defect management

Assign severity, owner, root cause, fix and retest result. Never mark a test PASS without evidence.

14. Release gate

All criticals closed, highs closed/accepted, regression green, performance budget met and legal claims approved.

6. Playwright Setup & CI Execution

The supplied QA document specifies Playwright installation, browser installation, named cross-platform projects and an HTML report.

■filecite■turn0file0■L308-L362■

```
npm install -D @playwright/test
npx playwright install --with-deps

npx playwright test --project="Windows Chrome" \
  --project="iOS Safari (iPhone 14)" \
  --project="Android Chrome (Pixel 7)"

npx playwright show-report
```

Recommended repository structure

```
e2e/
  smoke.spec.ts
  navigation.spec.ts
  product-catalogue.spec.ts
  product-details.spec.ts
  forms.spec.ts
  language.spec.ts
  responsive.spec.ts
  accessibility.spec.ts
  seo.spec.ts
```

security.spec.ts
performance.spec.ts

playwright.config.ts

Security tests involving XSS or rate limiting must be run only with authorization and controlled test data. Do not perform destructive or high-volume tests against the production deployment.

7. Complete Supplied 105-Point Matrix

The following preserves the supplied audit structure. Current status is evidence-based and conservative; most items require actual browser/device execution before a PASS/FAIL decision can be made.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
1	HIGH	iOS 100vh Viewport Cutoff	Safari bottom-bar viewport; verify 100dvh/visual CTA visibility	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
2	MEDIUM	Input Auto-Zoom on iOS	Focus every input at mobile widths; verify no unexpected zoom	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
3	MEDIUM	Sticky Header Jitter	Momentum-scroll Safari and inspect fixed/sticky header stability	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
4	HIGH	Notch & Dynamic Island Cutoff	Test safe-area insets on iPhone	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
5	LOW	Rubber-Band Flash	Overscroll page and verify background consistency	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
6	LOW	Native Date Picker Distortion	Open date inputs on iOS	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
7	MEDIUM	Backdrop Blur Invalidation	Verify WebKit backdrop blur	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
8	MEDIUM	300ms Click Latency	Tap controls and verify immediate response	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
9	LOW	Sticky Hover State on Tap	Tap controls/cards; hover must not remain stuck	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
10	LOW	Font Smoothing Discrepancy	Visual Retina typography check	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
11	MEDIUM	Nested Momentum Scroll Lock	Scroll modal/dropdown containers on iOS	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
12	MEDIUM	SVG Icon Scaling Collapse	Resize SVG/logo components	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
13	LOW	Auto Number Telephone Linking	Check phone-like strings	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
14	HIGH	Background Video Autoplay Failure	Verify muted/playsinline behavior	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
15	HIGH	Virtual Keyboard Modal Displacement	Open forms while keyboard is visible	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
16	LOW	Unintended Card Text Highlighting	Swipe/tap cards	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
17	LOW	Default Inner Input Shadow	Inspect iOS form controls	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
18	MEDIUM	3D Transform Z-Index Glitch	Test layered components	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
19	LOW	Native Media Control Badges	Check video/media placeholders	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
20	MEDIUM	Smart Invert Contrast Inversion	Test iOS Smart Invert	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
21	MEDIUM	Dynamic Address Bar Reflow	Scroll Android Chrome	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
22	LOW	Tap Highlight Overlay Box	Tap controls	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
23	HIGH	Keyboard Push Sticky Footer	Open mobile keyboard near fixed CTA	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
24	MEDIUM	Hardware Acceleration Jitter	Scroll animated UI on mid-range Android	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
25	MEDIUM	Hardware Back Button Closes Page	Open modal and press Android Back	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
26	LOW	Roboto Baseline Alignment	Inspect pills/badges	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
27	LOW	AMOLED Wide-Gamut Oversaturation	Visual OLED color check	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
28	LOW	Autofill Yellow Background	Use browser autofill	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
29	MEDIUM	Pull-to-Refresh Gesture Conflict	Swipe product carousel	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
30	HIGH	Touch Target Size Under 48px	Measure interactive targets	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
31	MEDIUM	Lazy-Loaded Layout Thrashing	Observe image loading/layout shifts	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
32	MEDIUM	Modern WebP/AVIF Fallback Loss	Test legacy WebView/fallback	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
33	LOW	Native Select Dropdown Truncation	Open long selectors	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
34	LOW	Missing Web App Manifest	Verify manifest/installability	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
35	LOW	Multi-Touch Pinch Disruption	Pinch/zoom interactive elements	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
36	HIGH	OS Font Scale 200% Breakage	Set accessibility text scale to 200%	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
37	MEDIUM	Landscape Orientation Re-render	Rotate device/tablet	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
38	MEDIUM	Touch Drag Gesture Sticking	Drag sliders; test touchcancel	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
39	LOW	Status Bar Theme Color Missing	Inspect browser chrome	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
40	HIGH	Cookie Banner Mobile Blocking	Verify consent UI is usable on mobile	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
41	MEDIUM	Scrollbar Layout Shift (15px)	Open/close modal on Windows	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
42	LOW	ClearType Font Pixelation	Inspect 1080p Windows typography	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
43	MEDIUM	Firefox Flex Gap Collapse	Cross-browser Firefox check	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
44	LOW	Middle-Click Autoscroll Lock	Middle-click/scroll containers	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
45	HIGH	Windows High Contrast Mode	Enable Windows high contrast	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
46	LOW	Mouse Wheel Velocity Scaling	Test physical wheel/trackpad	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
47	LOW	SVG Gradient Missing in Edge	Inspect SVG gradients	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
48	MEDIUM	Print Stylesheet Export Distortion	Print/save pages to PDF	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
49	CRITICAL	Keyboard Focus Trap in Modals	Tab through every modal	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
50	HIGH	Missing Visible Focus Rings	Keyboard-tab all controls	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
51	LOW	Multi-Monitor DPI Drag Blurring	Move window between DPI displays	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
52	LOW	Right-Click Context Menu Hijack	Copy/paste/context menu	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
53	MEDIUM	Text Ellipsis Without Tooltip	Inspect truncated long terms	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
54	MEDIUM	Enter Key Form Submission Glitch	Press Enter in inputs	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
55	MEDIUM	Sticky Sidebar Overlapping Footer	Scroll sticky elements into footer	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
56	LOW	CSS Subgrid Incompatibility	Test browsers lacking subgrid	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
57	HIGH	Blank Target Missing Rel Attributes	Audit target=_blank links	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
58	MEDIUM	Anchor Jump Hidden Behind Header	Test fragment links	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
59	LOW	Hover State Stacking Overdraw	Rapidly hover cards	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
60	MEDIUM	Video Codec Support Fallbacks	Test video formats	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
61	HIGH	Hero Title Duplication String	Compare H1/title/meta	PASS — live sampled	Homepage H1 is “Advancing Global Health”; page title is “Plexuspharmaco Europe Global Healthcare Solutions”; the specific duplicate was not observed.
62	CRITICAL	Broken Internal Route Links	Crawl every internal route	PARTIAL — live crawl	Homepage and several linked routes were reachable, but a complete browser click-through of all internal routes was not executed.
63	MEDIUM	Tablet Breakpoint Grid Collision	Test 768-1024px	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
64	LOW	Breadcrumb Trail Disconnect	Verify breadcrumb semantics	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
65	MEDIUM	Card Height Asymmetry	Compare variable-length cards	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
66	LOW	Orphaned Single-Word Lines	Inspect heading wrapping	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
67	HIGH	Corporate Logo Aspect Distortion	Inspect logo at breakpoints	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
68	MEDIUM	Missing Multi-Resolution Favicons	Check favicon/icon variants	NOT VERIFIED	Icon variants require direct HTTP/DOM verification.
69	MEDIUM	Mega-Menu Hover Tunnel Drop	Move cursor across dropdown	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
70	HIGH	Language Switcher Desync	Test EN/DE/FR/ES	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
71	CRITICAL	Legal & Impressum Entity Accuracy	Verify legal entity/VAT/Impressum	NEEDS OWNER VERIFICATION	Footer publishes Plexuspharmaco GmbH and a German address; registration/VAT/Impressum accuracy requires authoritative verification.
72	HIGH	Regulatory Badge Verification	Verify labels/alt/evidence	PARTIAL — live sampled	WHO GMP, ISO 9001:2015 and EU GMP claims are displayed; formal certification evidence is outside technical E2E scope.
73	HIGH	Unresponsive Pipeline Tables	Test R&D tables on mobile	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
74	MEDIUM	Empty Search State Missing	Search impossible term	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
75	MEDIUM	Async Button Loading State	Throttle network and submit	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
76	LOW	Inconsistent Corner Radii	Visual consistency audit	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
77	HIGH	Low Contrast Ratios (WCAG AA)	Measure text/background contrast	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
78	MEDIUM	Backdrop Click Modal Dismissal	Click outside modal	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
79	MEDIUM	Multiple H1 Heading Tags	Inspect heading hierarchy	PASS — live sampled	Sampled pages expose one primary H1; full-site crawl still required.
80	HIGH	Missing Alt Attributes on Images	Audit meaningful images	PARTIAL — live sampled	Sampled content exposes descriptive image labels; full DOM alt audit still required.
81	HIGH	Uncompressed Hero Assets (>2MB)	Measure image bytes/formats	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
82	CRITICAL	Silent Form Submission Failure	Submit inquiry/newsletter and simulate failure	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
83	HIGH	Client-Side Email Regex Flaws	Test malformed/edge emails	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
84	CRITICAL	XSS Sanitization Vulnerability	Authorized non-production security test	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
85	HIGH	API Rate-Limiting Missing	Safe controlled rate test	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
86	MEDIUM	Vercel Cache Header Headers	Inspect cache-control	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
87	HIGH	Render-Blocking Web Fonts	Profile font loading	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
88	HIGH	Cumulative Layout Shift (CLS >0.1)	Measure CLS	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
89	HIGH	Interaction to Next Paint (INP) Lag	Measure interaction latency	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
90	MEDIUM	Excessive Bundle Size Payload	Analyze JS bundle	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
91	MEDIUM	OpenGraph Social Meta Missing	Inspect OG tags	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
92	LOW	Twitter Card Tags Absent	Inspect Twitter/X card tags	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
93	HIGH	Missing Canonical Link Tag	Inspect canonical	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
94	CRITICAL	Robots.txt Production Disallow	Verify production crawl rules	NOT VERIFIED	robots.txt could not be verified through the current retrieval layer.
95	MEDIUM	Dynamic Sitemap.xml 404	Verify sitemap and routes	ENDPOINT REACHABLE	Sitemap endpoint is reachable; XML contents still require direct inspection.
96	HIGH	CORS Font Asset Blockage	Inspect font network/CORS	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
97	HIGH	Mixed Content Insecure Requests	Crawl HTTPS subresources	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
98	CRITICAL	Missing Strict Security Headers	Inspect CSP/frame/X-content headers	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

ID	Severity	Inspection	Execution method	Current status	Evidence / next step
99	CRITICAL	Pre-Consent Cookie Script Firing	Inspect network before consent	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
100	MEDIUM	Third-Party Script Thread Blocking	Profile external scripts	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
101	HIGH	React useEffect Memory Leak	Repeat mount/unmount and profile	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
102	CRITICAL	Next.js Hydration Mismatch	Inspect console/runtime hydration errors	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
103	CRITICAL	Unhandled React Error Boundary Crash	Trigger safe UI/API error and verify fallback	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
104	HIGH	Default 404 Error Page Fallback	Request invalid route	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.
105	HIGH	Production Source Map Exposure	Inspect production JS for .map	NOT EXECUTED	Requires real browser/device, DOM, network or performance execution.

8. Priority Fix Register

Priority	Severity	Items	Release rule
P0	Critical	Keyboard focus trap; broken internal routes; silent form failure; XSS sanitization; robots production blocking; strict security headers; pre-consent analytics; hydration/error-boundary failures	Must be tested and resolved before production sign-off.
P1	High	KPI zeros; touch targets; mobile keyboard/footer; high-contrast; focus rings; logo/translation issues; pipeline mobile overflow; contrast/alt; hero assets; email validation; rate limiting; fonts; CLS/INP; canonical; CORS/mixed content; 404/source maps	Resolve or formally accept with owner and evidence.
P2	Medium	Scroll/layout shifts, hover, dropdowns, caching, empty states, H1 structure, third-party scripts, sitemap and related UI behavior	Resolve during regression cycle.
P3	Low	Typography smoothing, hover polish, OLED color, wheel behavior, minor SVG/media presentation	Fix as time permits unless it affects brand/accessibility.

9. Final Release Acceptance Checklist

1. All 105 source tests have a final PASS/FAIL/accepted-risk result with evidence.
2. All additional 40 functional tests pass.
3. All critical security/accessibility/navigation/form defects are closed.
4. All high-severity defects are closed or formally accepted.
5. Homepage KPI values are correct and approved.
6. Product catalogue text has passed spelling and content QA.
7. All product details open correctly and show correct data.
8. Load More/search/filter behavior is regression-tested.
9. Newsletter/contact flows have success, validation and failure states.
10. All four language options have complete translation coverage.
11. All primary routes work on supported browsers.
12. Mobile widths have no horizontal overflow or clipped content.
13. Keyboard navigation and focus indicators work.
14. Image alt text and contrast meet the agreed accessibility target.
15. Core Web Vitals and performance budgets are recorded.
16. Required security headers are verified.
17. Cookie/analytics behavior is verified before consent.
18. robots.txt and sitemap.xml are correct for production.
19. 404 page is branded and returns HTTP 404.
20. Legal entity, address, registration/VAT and regulatory claims are approved by the responsible owner.
21. Production source maps are not unintentionally exposed.
22. Final Playwright CI report is green.

10. Final QA Conclusion

This master report combines the supplied 105-point QA matrix with the current live website evidence and an additional 40-point functional regression suite. It is intentionally conservative: it identifies confirmed live observations, but it does not invent PASS results for tests that require real browser/device interaction.

The current public deployment is substantial and reachable, but final sign-off should wait until the browser/device matrix, forms, accessibility, performance, security, SEO and legal verification are executed and evidenced. The most immediate visible fixes are the zero-valued homepage counters and the product-content spelling/formatting defects.

The supplied audit recommends Playwright configuration and execution across Windows Chrome, macOS Safari, iOS Safari and Android Chrome; those commands should be run in the development/CI environment to turn this report into an executed test report. ■filecite■turn0file0■L27-L44■

Prepared from: supplied Plexuspharmaco Europe QA Master Plan / Multi-Platform E2E Testing & Bug Matrix (8 pages, 105 inspection items) and current live website observations.
