

Plexuspharmaco Europe

End-to-End Website Testing & QA Report

<https://plexuspharmaco-eu.vercel.app/>

Audit date: 18 August 2026

105-point supplied QA matrix + live website verification + full test methodology

105 items	10 critical	30 high	37 medium	28 low
--------------	----------------	------------	--------------	-----------

IMPORTANT: This is a live-crawl + methodology report, not a claim that all 105 tests were executed in real browsers. A full Playwright run could not be completed here because the browser executable was unavailable and could not be downloaded. NOT TESTED therefore means exactly that.

1. Executive Summary

The supplied QA audit defines 105 cross-platform E2E checks covering iOS/WebKit, Android/Chromium, Windows/desktop, navigation/layout/content, and performance/network/forms/security. The document recommends Playwright across Windows Chrome, macOS Safari, iOS Safari and Android Chrome. ■filecite■turn0file0■L24-L44■

The public deployment is reachable. The live crawl confirms the main navigation, language controls, product catalogue, newsletter form, legal links and corporate content. ■filecite■turn0file0■L14-L30■

Release recommendation: **NO-GO for final production sign-off yet.** Fix the confirmed content issues and execute the remaining browser/device, form, accessibility, performance, security and legal verification suite.

2. Confirmed Live Findings

LF-01 — HIGH — Homepage KPI counters display zero values

The live homepage renders “0+ Global Partners”, “0+ Years Combined Experience”, “0 Therapeutic Categories” and “0+ Research Scientists”.

Fix: Replace the placeholder values with validated production data, or hide the counters until data is available.

LF-02 — MEDIUM — Product catalogue copy contains defects

Visible examples include “kid s”, “multiviamin”, “anti aging ageslow”, “PlexWell_Junior”, and a product title ending with “))”.

Fix: Perform a complete product-content QA pass and normalize names, descriptions, punctuation and terminology.

LF-03 — MEDIUM — Newsletter form needs E2E validation

The homepage exposes an email field and Subscribe control, but live crawl cannot submit the form or verify success/error behavior.

Fix: Test valid, invalid, empty, duplicate and network-failure cases in a real browser.

LF-04 — MEDIUM — Language switcher needs browser verification

English, German, French and Spanish controls are exposed, but the crawl does not prove that all strings switch and persist.

Fix: Test every language on home, catalogue, legal and contact flows.

LF-05 — MEDIUM — Legal and regulatory claims need owner verification

The site presents WHO GMP, ISO 9001:2015, EU GMP, addresses and regulatory claims; technical testing cannot establish their legal truth.

Fix: Have the client/legal owner verify every claim against authoritative evidence.

LF-06 — LOW — Product count/load-more needs regression coverage

Catalogue says 162 solutions and 150 remaining, consistent with 12 initially visible products.

Fix: Run Load More to completion and check duplicates, missing products, images and counts.

Live evidence

The homepage currently exposes KPI counters of 0+ Global Partners, 0+ Years Combined Experience, 0 Therapeutic Categories and 0+ Research Scientists, plus a newsletter email field and Subscribe control. ■filecite■turn0file0■L140-L153■ ■filecite■turn0file0■L315-L321■

The catalogue states 162 premium solutions and “150 remaining”, which is consistent with 12 initially visible products. The crawl also shows copy defects such as “kid s”, “multiviamin”, “anti aging ageslow” and a title ending in “))”. ■filecite■turn0file0■L69-L80■

■filecite■turn0file0■L113-L136■ ■filecite■turn0file0■L191-L225■

3. Full E2E Testing Method

A. Test planning

Freeze the production URL, enumerate routes, define browsers/devices/test data, and classify smoke, functional, regression, accessibility, performance and security tests.

B. Browser/device matrix

Run Windows Chrome/Edge/Firefox, Safari/WebKit, iPhone Safari, Android Chrome and tablet breakpoints. The supplied plan explicitly proposes Windows Chrome, macOS Safari, iOS Safari and Android Chrome.

C. Smoke

Open homepage, hard-refresh, verify title/H1, primary CTAs, no blank screen and basic navigation.

D. Route testing

Click/crawl every header, footer, CTA, product, news and legal link; record status, redirects, final URL and title.

E. UI/UX

Check typography, spacing, cards, buttons, sticky headers, menus, hover/focus, modals, carousels and footer.

F. Responsive

Run 320/375/390/430px mobile, 768/1024px tablet and 1280/1440px+ desktop; repeat after rotation.

G. Functional

Test search, filters, Load More, language switching, forms, modal open/close, anchors and product details.

H. Negative

Use empty fields, malformed emails, long strings, special characters, no-result searches, repeated clicks, slow network and failed requests.

I. Accessibility

Keyboard-only navigation, focus visibility, headings, labels, alt text, touch targets, contrast, reduced motion and zoom/high-contrast.

J. Performance

Measure Core Web Vitals, image bytes, JS bundle, fonts, layout shift, interaction latency, caching and third-party scripts.

K. Security/privacy

Verify HTTPS, security headers, safe input handling, rate limits, CORS, cookie timing, source maps, robots/sitemap and mixed content.

L. Evidence/sign-off

For each failure record ID, URL, environment, steps, expected/actual result, severity, screenshot/video, console/network evidence and fix; retest after correction.

4. Playwright Execution

The supplied audit gives the following installation and execution commands. ■filecite■turn0file0■L308-L362■

```
npm install -D @playwright/test
npx playwright install --with-deps

npx playwright test --project="Windows Chrome" \
  --project="iOS Safari (iPhone 14)" \
  --project="Android Chrome (Pixel 7)"

npx playwright show-report
```

Recommended test suites

```
e2e/
  smoke.spec.ts
  navigation.spec.ts
  products.spec.ts
  forms.spec.ts
  language.spec.ts
  responsive.spec.ts
  accessibility.spec.ts
  security.spec.ts
  performance.spec.ts
  playwright.config.ts
```

5. Developer Test Templates

```
import { test, expect } from '@playwright/test';

test('homepage smoke', async ({ page }) => {
  await page.goto('/');
  await expect(page).toHaveTitle(/Plexuspharmaco/i);
  await expect(page.locator('h1')).toBeVisible();
});

test('product search', async ({ page }) => {
  await page.goto('/product-catalogue');
  const box = page.getByPlaceholder(/Search products/i);
  await box.fill('Vitamin D3');
  await expect(page.locator('text=Vitamin D3').first()).toBeVisible();
});

test('empty search state', async ({ page }) => {
  await page.goto('/product-catalogue');
  await page.getByPlaceholder(/Search products/i)
    .fill('THIS_PRODUCT_SHOULD_NOT_EXIST_12345');
  // Assert explicit zero-results UI.
});

test('keyboard focus', async ({ page }) => {
  await page.goto('/');
  await page.keyboard.press('Tab');
  await expect(page.locator(':focus')).toBeVisible();
});
```

Security tests such as XSS and rate-limit testing should be performed only with authorization and controlled test data; do not run destructive/high-volume tests against production.

6. Complete 105-Point Matrix

Current result labels are conservative. PASS means supported by live crawl evidence; PARTIAL means only part of the requirement was checked; NEEDS VERIFICATION means an owner/legal check remains; NOT VERIFIED means the retrieval layer could not establish the condition; NOT TESTED means real browser/device/DOM/network execution is still required.

ID	Severity	Inspection	Method	Status	Evidence
1	HIGH	iOS 100vh Viewport Cutoff	Use 100dvh; test Safari bottom bars	NOT TESTED	Real browser/device execution required.
2	MEDIUM	Input Auto-Zoom on iOS	Focus all inputs at 320-430px; verify no zoom	NOT TESTED	Real browser/device execution required.
3	MEDIUM	Sticky Header Jitter	Momentum-scroll Safari; verify header stability	NOT TESTED	Real browser/device execution required.
4	HIGH	Notch & Dynamic Island Cutoff	Test safe-area insets on iPhone	NOT TESTED	Real browser/device execution required.
5	LOW	Rubber-Band Flash	Overscroll page; verify background consistency	NOT TESTED	Real browser/device execution required.
6	LOW	Native Date Picker Distortion	Open every date input on iOS	NOT TESTED	Real browser/device execution required.
7	MEDIUM	Backdrop Blur Invalidation	Verify nav/modal blur in WebKit	NOT TESTED	Real browser/device execution required.
8	MEDIUM	300ms Click Latency	Tap interactive controls; measure response	NOT TESTED	Real browser/device execution required.
9	LOW	Sticky Hover State on Tap	Tap cards/buttons; verify hover doesn't stick	NOT TESTED	Real browser/device execution required.
10	LOW	Font Smoothing Discrepancy	Visual typography check on Retina	NOT TESTED	Real browser/device execution required.
11	MEDIUM	Nested Momentum Scroll Lock	Scroll modal/dropdowns on iOS	NOT TESTED	Real browser/device execution required.
12	MEDIUM	SVG Icon Scaling Collapse	Check logos/icons at multiple sizes	NOT TESTED	Real browser/device execution required.
13	LOW	Auto Number Telephone Linking	Verify phone-like strings don't auto-link	NOT TESTED	Real browser/device execution required.
14	HIGH	Background Video Autoplay Failure	Check muted/playsinline video behavior	NOT TESTED	Real browser/device execution required.
15	HIGH	Virtual Keyboard Modal Displacement	Open forms with keyboard; verify modal	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
16	LOW	Unintended Card Text Highlighting	Swipe/tap cards; verify no selection	NOT TESTED	Real browser/device execution required.
17	LOW	Default Inner Input Shadow	Inspect iOS input styling	NOT TESTED	Real browser/device execution required.
18	MEDIUM	3D Transform Z-Index Glitch	Test layered menus/modals	NOT TESTED	Real browser/device execution required.
19	LOW	Native Media Control Badges	Check video/image placeholders	NOT TESTED	Real browser/device execution required.
20	MEDIUM	Smart Invert Contrast Inversion	Enable Smart Invert; verify logos	NOT TESTED	Real browser/device execution required.
21	MEDIUM	Dynamic Address Bar Reflow	Scroll Android Chrome; verify layout	NOT TESTED	Real browser/device execution required.
22	LOW	Tap Highlight Overlay Box	Tap controls; verify no flash	NOT TESTED	Real browser/device execution required.
23	HIGH	Keyboard Push Sticky Footer	Open mobile keyboard near fixed CTA	NOT TESTED	Real browser/device execution required.
24	MEDIUM	Hardware Acceleration Jitter	Scroll animations on mid-range Android	NOT TESTED	Real browser/device execution required.
25	MEDIUM	Hardware Back Button Closes Page	Open modal; press Android Back	NOT TESTED	Real browser/device execution required.
26	LOW	Roboto Baseline Alignment	Inspect badges/pills	NOT TESTED	Real browser/device execution required.
27	LOW	AMOLED Wide-Gamut Oversaturation	Visual color check on OLED	NOT TESTED	Real browser/device execution required.
28	LOW	Autofill Yellow Background	Use browser autofill	NOT TESTED	Real browser/device execution required.
29	MEDIUM	Pull-to-Refresh Gesture Conflict	Swipe product carousel horizontally	NOT TESTED	Real browser/device execution required.
30	HIGH	Touch Target Size Under 48px	Measure touch targets	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
31	MEDIUM	Lazy-Loaded Layout Thrashing	Observe image loading/layout shifts	NOT TESTED	Real browser/device execution required.
32	MEDIUM	Modern WebP/AVIF Fallback Loss	Test legacy WebView/fallback formats	NOT TESTED	Real browser/device execution required.
33	LOW	Native Select Dropdown Truncation	Open long category selectors	NOT TESTED	Real browser/device execution required.
34	LOW	Missing Web App Manifest	Check manifest/installability	NOT TESTED	Real browser/device execution required.
35	LOW	Multi-Touch Pinch Disruption	Pinch/zoom interactive components	NOT TESTED	Real browser/device execution required.
36	HIGH	OS Font Scale 200% Breakage	Set 200% text scale	NOT TESTED	Real browser/device execution required.
37	MEDIUM	Landscape Orientation Re-render	Rotate tablet/mobile	NOT TESTED	Real browser/device execution required.
38	MEDIUM	Touch Drag Gesture Sticking	Drag sliders; test touchcancel	NOT TESTED	Real browser/device execution required.
39	LOW	Status Bar Theme Color Missing	Inspect mobile browser chrome	NOT TESTED	Real browser/device execution required.
40	HIGH	Cookie Banner Mobile Blocking	Test consent UI at mobile widths	NOT TESTED	Real browser/device execution required.
41	MEDIUM	Scrollbar Layout Shift (15px)	Open/close modal on Windows	NOT TESTED	Real browser/device execution required.
42	LOW	ClearType Font Pixelation	Inspect Windows 1080p typography	NOT TESTED	Real browser/device execution required.
43	MEDIUM	Firefox Flex Gap Collapse	Run Firefox cross-browser test	NOT TESTED	Real browser/device execution required.
44	LOW	Middle-Click Autoscroll Lock	Middle-click/scroll inside containers	NOT TESTED	Real browser/device execution required.
45	HIGH	Windows High Contrast Mode	Enable high contrast; verify controls	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
46	LOW	Mouse Wheel Velocity Scaling	Use physical wheel/trackpad	NOT TESTED	Real browser/device execution required.
47	LOW	SVG Gradient Missing in Edge	Inspect SVG gradients in Edge	NOT TESTED	Real browser/device execution required.
48	MEDIUM	Print Stylesheet Export Distortion	Print/save pages to PDF	NOT TESTED	Real browser/device execution required.
49	CRITICAL	Keyboard Focus Trap in Modals	Tab through open modal	NOT TESTED	Real browser/device execution required.
50	HIGH	Missing Visible Focus Rings	Keyboard-tab all controls	NOT TESTED	Real browser/device execution required.
51	LOW	Multi-Monitor DPI Drag Blurring	Move window between DPI displays	NOT TESTED	Real browser/device execution required.
52	LOW	Right-Click Context Menu Hijack	Use copy/paste/context menu	NOT TESTED	Real browser/device execution required.
53	MEDIUM	Text Ellipsis Without Tooltip	Check truncated long terms	NOT TESTED	Real browser/device execution required.
54	MEDIUM	Enter Key Form Submission Glitch	Press Enter in form fields	NOT TESTED	Real browser/device execution required.
55	MEDIUM	Sticky Sidebar Overlapping Footer	Scroll to footer with sticky nav	NOT TESTED	Real browser/device execution required.
56	LOW	CSS Subgrid Incompatibility	Test browsers without subgrid	NOT TESTED	Real browser/device execution required.
57	HIGH	Blank Target Missing Rel Attributes	Inspect target=_blank links	NOT TESTED	Real browser/device execution required.
58	MEDIUM	Anchor Jump Hidden Behind Header	Test #fragment navigation	NOT TESTED	Real browser/device execution required.
59	LOW	Hover State Stacking Overdraw	Rapidly hover cards	NOT TESTED	Real browser/device execution required.
60	MEDIUM	Video Codec Support Fallbacks	Test video formats	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
61	HIGH	Hero Title Duplication String	Compare H1/title/meta	PASS — sampled	Homepage H1 is "Advancing Global Health"; page title is different, so the described duplicate string was not observed.
62	CRITICAL	Broken Internal Route Links	Crawl/click all internal routes	PARTIAL	Homepage, product catalogue, privacy policy and corporate governance were reachable; full click-through of every internal route was not executed.
63	MEDIUM	Tablet Breakpoint Grid Collision	Test 768-1024px widths	NOT TESTED	Real browser/device execution required.
64	LOW	Breadcrumb Trail Disconnect	Verify breadcrumb semantics	NOT TESTED	Real browser/device execution required.
65	MEDIUM	Card Height Asymmetry	Compare cards with different text	NOT TESTED	Real browser/device execution required.
66	LOW	Orphaned Single-Word Lines	Check heading wrapping	NOT TESTED	Real browser/device execution required.
67	HIGH	Corporate Logo Aspect Distortion	Inspect logo at breakpoints	NOT TESTED	Real browser/device execution required.
68	MEDIUM	Missing Multi-Resolution Favicons	Request favicon/icon variants	NOT VERIFIED	Favicon/icon variants were not exposed by the live content crawl.
69	MEDIUM	Mega-Menu Hover Tunnel Drop	Move cursor across dropdown gap	NOT TESTED	Real browser/device execution required.
70	HIGH	Language Switcher Desync	Switch EN/DE/FR/ES; verify all strings	NOT TESTED	Real browser/device execution required.
71	CRITICAL	Legal & Impressum Entity Accuracy	Verify legal entity/VAT/Impressum	NEEDS VERIFICATION	Footer shows Plexuspharmaco GmbH and a German address, but legal registration/VAT/Impressum accuracy needs authoritative verification.
72	HIGH	Regulatory Badge Verification	Verify badge labels/alt/evidence	PARTIAL	WHO GMP, ISO 9001:2015 and EU GMP claims are displayed; formal evidence and DOM-level alt-text checks remain.
73	HIGH	Unresponsive Pipeline Tables	Check tables at mobile widths	NOT TESTED	Real browser/device execution required.
74	MEDIUM	Empty Search State Missing	Search zero-result query	NOT TESTED	Real browser/device execution required.
75	MEDIUM	Async Button Loading State	Throttle network; submit; verify spinner/disabled	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
76	LOW	Inconsistent Corner Radii	Visual design consistency check	NOT TESTED	Real browser/device execution required.
77	HIGH	Low Contrast Ratios (WCAG AA)	Measure text/background contrast	NOT TESTED	Real browser/device execution required.
78	MEDIUM	Backdrop Click Modal Dismissal	Click outside active modal	NOT TESTED	Real browser/device execution required.
79	MEDIUM	Multiple H1 Heading Tags	Inspect heading hierarchy	PASS — sampled	Sampled homepage, catalogue, privacy and governance pages expose one primary H1.
80	HIGH	Missing Alt Attributes on Images	Audit meaningful images for alt text	PASS — sampled	Sampled images are exposed with descriptive image labels; a complete DOM alt audit remains.
81	HIGH	Uncompressed Hero Assets (>2MB)	Measure image bytes and formats	NOT TESTED	Real browser/device execution required.
82	CRITICAL	Silent Form Submission Failure	Submit inquiry/newsletter; verify errors/success	NOT TESTED	Real browser/device execution required.
83	HIGH	Client-Side Email Regex Flaws	Test malformed/edge-case email inputs	NOT TESTED	Real browser/device execution required.
84	CRITICAL	XSS Sanitization Vulnerability	Security test input sanitization in authorized test env	NOT TESTED	Real browser/device execution required.
85	HIGH	API Rate-Limiting Missing	Load/rate test contact endpoint safely	NOT TESTED	Real browser/device execution required.
86	MEDIUM	Vercel Cache Header Headers	Inspect cache-control headers	NOT TESTED	Real browser/device execution required.
87	HIGH	Render-Blocking Web Fonts	Measure font loading/render blocking	NOT TESTED	Real browser/device execution required.
88	HIGH	Cumulative Layout Shift (CLS >0.1)	Run Lighthouse/Performance trace	NOT TESTED	Real browser/device execution required.
89	HIGH	Interaction to Next Paint (INP) Lag	Measure interaction latency	NOT TESTED	Real browser/device execution required.
90	MEDIUM	Excessive Bundle Size Payload	Analyze JS bundle/unused modules	NOT TESTED	Real browser/device execution required.

ID	Severity	Inspection	Method	Status	Evidence
91	MEDIUM	OpenGraph Social Meta Missing	Inspect og:title/description/image	NOT TESTED	Real browser/device execution required.
92	LOW	Twitter Card Tags Absent	Inspect twitter:card metadata	NOT TESTED	Real browser/device execution required.
93	HIGH	Missing Canonical Link Tag	Inspect rel=canonical	NOT TESTED	Real browser/device execution required.
94	CRITICAL	Robots.txt Production Disallow	Verify robots.txt allows intended crawling	NOT VERIFIED	robots.txt could not be retrieved through the current web retrieval layer.
95	MEDIUM	Dynamic Sitemap.xml 404	Verify sitemap exists and lists routes	PASS — endpoint reachable	The sitemap endpoint responded, but its XML content could not be inspected by the retrieval layer.
96	HIGH	CORS Font Asset Blockage	Check font requests and CORS	NOT TESTED	Real browser/device execution required.
97	HIGH	Mixed Content Insecure Requests	Crawl HTTPS page for HTTP subresources	NOT TESTED	Real browser/device execution required.
98	CRITICAL	Missing Strict Security Headers	Inspect CSP/X-Frame/X-Content-Type headers	NOT TESTED	Real browser/device execution required.
99	CRITICAL	Pre-Consent Cookie Script Firing	Test network before consent	NOT TESTED	Real browser/device execution required.
100	MEDIUM	Third-Party Script Thread Blocking	Profile third-party scripts	NOT TESTED	Real browser/device execution required.
101	HIGH	React useEffect Memory Leak	Repeat mount/unmount; profile listeners	NOT TESTED	Real browser/device execution required.
102	CRITICAL	Next.js Hydration Mismatch	Check console/runtime for hydration errors	NOT TESTED	Real browser/device execution required.
103	CRITICAL	Unhandled React Error Boundary Crash	Force safe API/UI errors; verify fallback	NOT TESTED	Real browser/device execution required.
104	HIGH	Default 404 Error Page Fallback	Request invalid route; verify branded 404	NOT TESTED	Real browser/device execution required.
105	HIGH	Production Source Map Exposure	Inspect production JS for .map files	NOT TESTED	Real browser/device execution required.

7. Release Acceptance Checklist

1. All 105 matrix items have PASS, FAIL or accepted-risk decisions.
2. All CRITICAL issues are fixed and retested.
3. All HIGH issues are fixed or formally accepted.
4. Homepage KPI counters contain validated production data.
5. Product names/descriptions pass spelling and terminology QA.
6. All navigation/footer links have been clicked and verified.
7. Search, filters and Load More work without duplicates or missing products.
8. Newsletter/contact forms pass valid, invalid, empty, duplicate and network-failure tests.
9. English, German, French and Spanish switching works consistently.
10. Mobile/tablet/desktop layouts have no overflow, clipping or broken CTAs.
11. Keyboard navigation and visible focus work throughout the site.
12. WCAG contrast and meaningful image alt text are verified.
13. Core Web Vitals and asset/bundle budgets meet agreed thresholds.
14. Required security headers are verified.
15. Cookie/analytics behavior is verified before and after consent.
16. robots.txt and sitemap.xml are verified for production indexing.
17. 404 behavior is branded and returns the expected status.
18. Production source maps are not unintentionally exposed.
19. Legal entity, address, VAT/registration, privacy/terms and regulatory claims are verified by the responsible owner.
20. Final regression passes on the supported browser/device matrix.

8. Final Conclusion

The website is publicly reachable and has substantial content, but it is not yet fully E2E-verified. The confirmed live issues are primarily content/data quality: zero KPI counters and several product text defects. The highest technical risk remains the unexecuted browser/device, form, accessibility, performance and security portions of the 105-point matrix.

After the developer runs the Playwright suite in CI/local with Chromium/WebKit and the required mobile profiles, replace each NOT TESTED result with actual PASS/FAIL evidence and attach screenshots, traces, console logs and network evidence to the defect tickets.

Source: supplied 8-page "Multi-Platform E2E Testing & Bug Matrix — Plexuspharmaco Europe Quality Assurance & Verification Suite", containing 105 inspection items.
